

NAITIK SINGHAL

Electrical Engineering Student | AI Applications & Product Development

nsinghal_be26@thapar.edu

GitHub: [naitiksinghalns-netizen](#) | LinkedIn: [naitik-singhal-43512b427](#)

PROFILE

First-year engineering student interested in solving practical problems across AI, web, and native applications. Developed two Team Vincera applications and directing Pinebot's development with AI coding tools. Focused on useful interfaces, iterative problem-solving, and turning ideas into demonstrable prototypes.

EDUCATION

Thapar Institute of Engineering & Technology, Patiala

Electrical Engineering | First-year undergraduate, 2026

PROJECTS

Smriti Saathi | Team Vincera - Team Lead / App Developer | 2026

Stack: React, TypeScript, Vite, Tailwind CSS, Capacitor, IndexedDB, Node.js

- Developed an offline-first assistive app for cognitive activities, memory and routine support, and caregiver assistance.
- Project combines adaptive games, multilingual voice interaction, and local data storage; presented at Thapar's SIH 2026 internal hackathon.

github.com/TeamVincera/smriti-saathi

Bharat Samvida | Team Vincera - App Developer | 2026

Stack: Next.js, React, TypeScript, Groq, Zod, GSAP, Three.js, Netlify

- Developed an AI-assisted tender drafting application with clarification questions, source-linked standard suggestions, and a legal document library.
- Project supports English/Hindi interfaces and PDF, Word, and JSON exports for human review.

github.com/TeamVincera/bharat-samvida

Pinebot | Independent Project - Product Direction & AI-assisted Development | 2026

Stack: Swift 6, SwiftUI, AppKit, Apple speech frameworks, ACP, GLiClass/ONNX

- Defined a quiet, movable desktop companion with voice activation, short replies, and capability-aware model routing.
- Prototype demonstrated Calculator launch and Apple Music control with result readback; broader automation remains in development.

ACHIEVEMENT & SKILLS

Smart India Hackathon 2026: Team Vincera cleared the internal round at TIET with Smriti Saathi.

Project experience: Web/app development, AI integration, offline-first interfaces, product iteration, and team collaboration. **Strengths:** Problem-solving and exploring solutions across different domains.
